*The Bear Conservationist*

Jack Hanna is an American zookeeper and animal expert. He enjoyed working with animals at a young age and volunteered with a local veterinarian when he was a child. When he was an adult, he became a zookeeper and eventually became the director of Columbus Zoo in Ohio, in the US. When he joined the zoo, it was dirty and the animals lived in cages. After the zoo was closed for the day, Jack would walk around picking up the trash. He built new animal habitats at the zoo so that the animals didn't live inside cages. Jack went on television to educate adults and children about animal habitats and the conservation of wild animals. Now, lots of people visit Columbus Zoo every year and learn about different wild animals.

1.- Jack Hanna is an American poacher

True

False
